SBC labs
SUSTAINABLE BEHAVIOUR CHANGE

BigHammer.ai

How SBC Labs is building a first-of-its-kind rural Customer Readiness Score

Many kinds of data in. **One score out.** Built on our AI Data Engineer.

Srinath Reddy - Founder & CEO

BigHammer.ai

The problem

No transaction data for hundreds of millions

For hundreds of millions of people across rural India, there is **no transaction history.** So banks and lenders can't see who is ready for which financial product.

Savings ?

ready to save?

Credit ?

ready to borrow?

Investment ?

ready to invest?

Insurance ?

ready to insure?

Nothing to score from

No history. No way to see who is ready.

The data

So SBC Labs reads the signals that do exist

Alternate data, from many places, **each collected in its own way.**

Surveys	`survey`
Programmable data	`programmable`
Product usage signals	`usage signal`
Phone usage	`structural indicator`
Internet penetration	`structural indicator`

Useful signals. Very different shapes.

BigHammer.ai

Step 1

Onboard many different sources

Our AI Data Engineer brings every source in, **whatever its shape.**

Every shape, one place

AI Data Engineer · **Sources**

SOURCE	TYPE	STATUS
Surveys	survey	Onboarded
Programmable data	programmable	Onboarded
Product usage signals	usage signal	Onboarded
Phone usage	structural indicator	Onboarded
Internet penetration	structural indicator	Onboarded

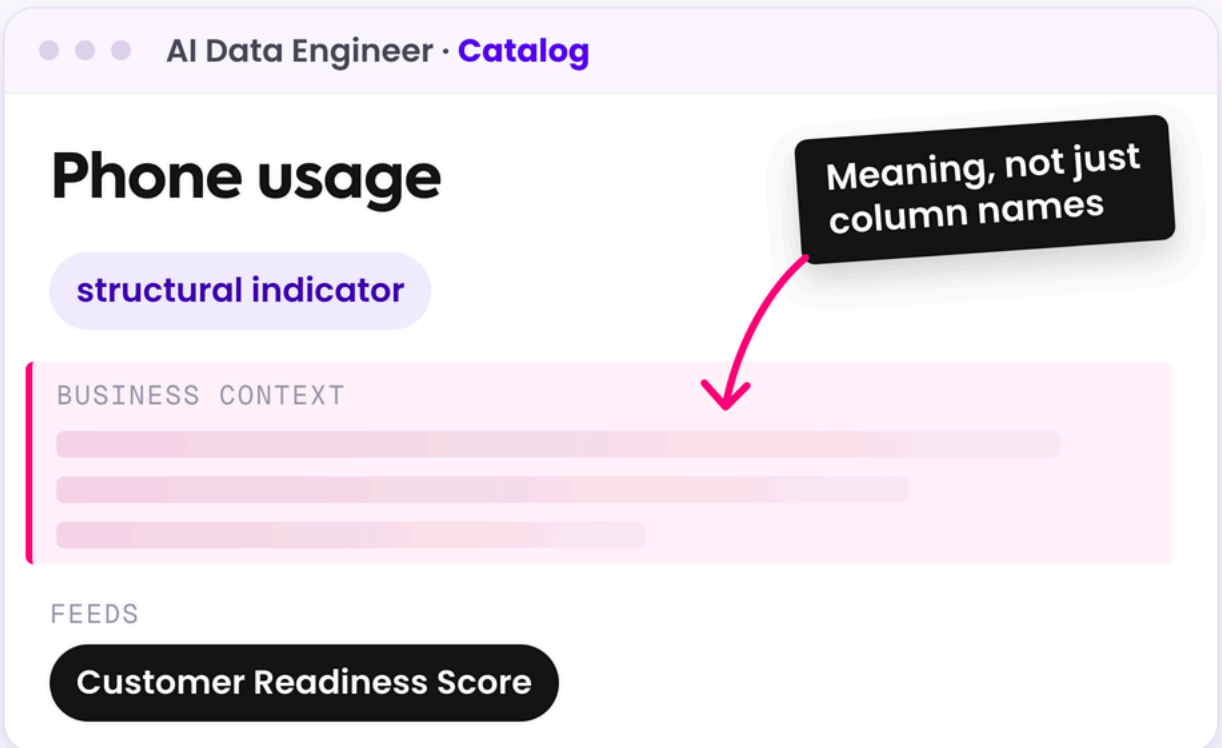

Different shapes. One platform.

BigHammer.ai

Step 2

Catalog each dataset with business context

Every dataset gets a plain-language entry: **what it is and what it's for.**

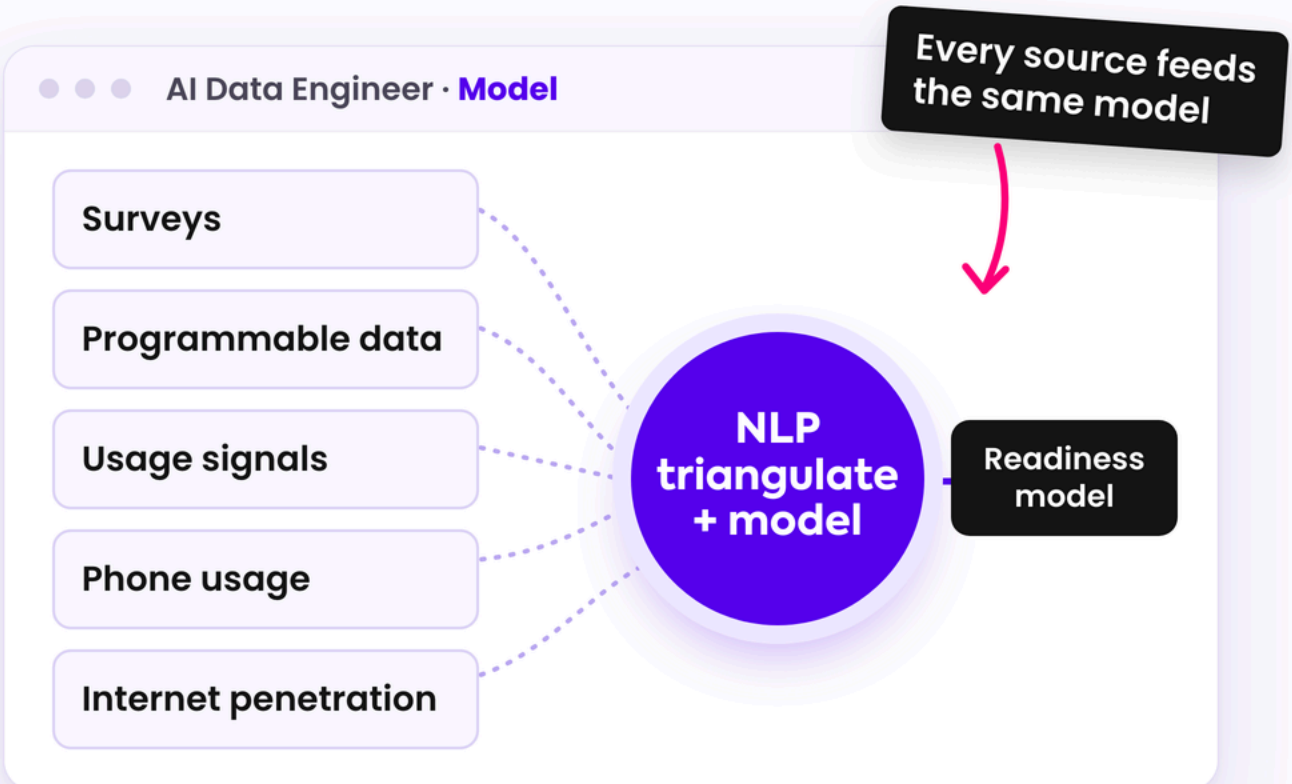

Data that people can actually read.

BigHammer.ai

Step 3

Apply NLP to triangulate and model

NLP reads across the sources and **checks each signal against the others** before anything is modelled.

No single source decides alone.

BigHammer.ai

Step 4

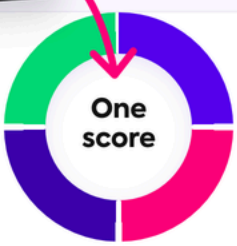

One unified Customer Readiness Score

Savings, credit, investment and insurance, **in one score.**

AI Data Engineer · **Score**

Who is ready, but still unserved?

Customer Readiness Score

FROM

Surveys | Programmable data | Product usage signals | Phone usage | Internet penetration

COVERS

Savings | Credit | Investment | Insurance

BUILT FOR Banks | FinTechs | Microfinance institutions

Many sources in. One score out.

BigHammer.ai

The impact

Built for the bottom of the pyramid

Financial inclusion

Women in rural India

Healthcare access

Banks, FinTechs and microfinance institutions can find people **who are ready, but not yet served.**

Next, SBC Labs is exploring scores for:

- Agriculture insurance
- Automotive financing
- Farm equipment leasing
- Healthcare access

Ready, but unseen. Now, measurable.
