A green tick tells you the job finished. Not that it was right.

WHAT THE RUN CHECKS Succeeded

Did the job finish?

WHAT WE CHECK BEFORE SWITCH-OFF

1. Row and column counts
2. Schema: same columns, same types
3. Null rates per column
4. Numeric aggregates: sums, min, max
5. Row by row, by business key or by hash

All five match? Switch off the old job and stop paying for both.
